

INSTRUCTIONS FOR INSTALLING APPLICATION FOR BLUE&ME™ MAP

WARNING

The update process is an operation to be performed with maximum attention to the instructions. In the event of errors the system may not work.

1. From the official FGA website www.fiat.com access the **Blue&Me™** section and download the .zip file containing the update application.
2. Unzip the .zip file downloaded into a suitable dedicated directory (e.g. c:\Blue&Me). At the end check that the following files are present:
 - **install.inf**
 - **CheckPlatform.ARM920.CAB**
 - **MXY_N_x_4_PND-C1conf.ARM920.CAB**
 - **MXY_N_x_4_PND-C1matrix.ARM920.CAB**
 - **PND_Application.zip**
3. Prepare a USB memory stick, with a capacity of at least 128 Mb, **formatting the memory in FAT32** mode to delete all the data previously contained.

NOTE *It is advisable to use a USB storage device with a capacity of less than 8 Gb.*

4. Store the files previously downloaded in the USB stick main directory (folder), checking that they have all been copied correctly

WARNING

During the software update phase the steering wheel buttons shouldn't be pressed!

5. With the car stationary and the ignition key in the **STOP** position, insert the memory stick in the **Blue&Me™** USB port situated on the centre console or in the glove compartment box.
(The update is not available for cars NOT fitted with a USB media player port, do not use the USB diagnosis port present on the control unit)
6. Turn the ignition key to the **MAR** position, WITHOUT STARTING THE CAR, turn the radio on taking care to remove any warning messages (e.g. door open...) on the display by pressing the "Mode" or "Menu" button (depending on the car to be updated).

WARNING ***Never extract the memory stick from the USB port for any reason before the software update procedure has finished properly!***

7. On the display of the control panel the message: "**UPDATE IN PROGRESS**" will be displayed and the voice message "**update started**" will be played . If this does not happen turn the key to the **STOP** position and then **MAR** again. During the update some messages on the progression of the process will be displayed.
8. When the update is over the message "**COMPLETE**" will be displayed on the control panel and the voice message "**update complete, remove the USB stick**" will be played.

9. The **Blue&Me™** update process is complete, turn the ignition key to the **STOP** position and extract the USB stick.

10. Register again with Blue&Me™

If the update is not complete the message "USB xx error" will appear on the display and the following voice message will be played: "There was an error during the update". In this case repeat the procedure starting again from point 1.
